Date: April 10th, 2026

Subject: Price Adjustment Notification Effective June 8, 2026

Dear Valued Customer,

Thank you for your continued partnership and support.

Due to ongoing volatility in the global market, we are experiencing sustained increases in raw material, logistics, and manufacturing costs. In particular, the sharp rise in APT (Ammonium Paratungstate) since the beginning of 2026 has significantly accelerated raw material expenses, placing considerable pressure on overall production costs.

As a result, Nachi America Tools Division will implement price adjustments effective **June 8, 2026**, as follows:

- 7% increase on carbide drills
- 7% increase on taps
- Carbide end mill pricing will vary based on diameter; please refer to the updated price file for details
- No increase on HSS and HSCO drills

We have made every effort to absorb these rising costs; however, current market conditions make this adjustment necessary to maintain the quality and service you expect.

Please review the updated pricing file for complete details. Pricing for special-order items will continue to be evaluated based on market conditions, with updates provided individually through your account representative.

If you have any questions, please contact your account representative at your convenience.

Thank you for your understanding and continued support.

Sincerely,

Adam Shockley

Operations Manager - Tools
